Summary Prospectus for New Investors

May 1, 2025

This summary prospectus (the "Summary Prospectus") summarizes key features of the contract. Before you invest, you should also review the statutory prospectus (the "prospectus") for the contract, which contains more information about the contract's features, benefits, and risks. You can find this document and other information about the contract online at www.equitable.com/ICSR#EQH146654. You can also obtain this information at no cost by calling 1-877-522-5035, by sending an email request to EquitableFunds@dfinsolutions.com, or by calling your financial intermediary.

The EQUI-VEST® Strategies (Series 900) contracts are variable and fixed group flexible premium deferred annuity contracts offered as a funding vehicle for employers' sponsored retirement plans. This Summary Prospectus only describes EQUI-VEST® Strategies (Series 900). The contracts provide for the accumulation of retirement savings and for income. The contracts offer income and death benefit protection as well. They also offer a number of payout options.

You invest to accumulate value on a tax-deferred basis in one or more of our investment options (i) variable investment options, (ii) the guaranteed interest option, (iii) the fixed maturity options, (iv) the Segments of the Structured Investment Option ("SIO"), or (v) the dollar cost averaging (the "DCA program") (collectively, the "investment options"). See Appendix "Investment options available under the contract" in the prospectus. The SIO gives you the opportunity to earn interest that we will credit based, in part, on the performance of an external index over a set period of time, although you could experience a negative return and a significant loss of principal and previously credited interest.

The Securities and Exchange Commission has not approved or disapproved these securities or passed upon the adequacy of this prospectus. Any representation to the contrary is a criminal offense.

The contract is a complex investment that involves risks, including potential loss of principal and previously credited interest. You should speak with a financial professional about the features, benefits, risks, and fees and whether the contract is appropriate for you based on your financial situation and objectives.

The extent of the downside protection at Segment maturity, also referred to as the Segment Buffer, varies by Segment, ranging from the first 10% to 20% of loss. There is a risk of a substantial loss of your principal and previously credited interest because you agree to absorb all losses to the extent they exceed the Segment Buffer at Segment maturity. **You could lose as much as 80% (for Segments with a -20% Segment Buffer) to 90% (for Segments with a -10% Segment Buffer) of your principal and previously credited interest due to negative index performance at Segment maturity, depending on the Segment Buffer applicable to the Segment in which you invest. The cumulative loss over the life of the contract could be much greater. We may change the index options in the future, but we will always offer a Segment Option with a Segment Buffer that protects the first 10% of loss. If we only offer one index option, you will be limited to investing in only one index option with terms that may not be acceptable to you and other investment options where performance is not based on the performance of an index and that do not offer any protection from investment loss. If you are not happy with the limited investment options and choose to surrender the contract you will be subject to the interim value adjustment, federal and state taxes, and penalties, purchasing a new contract with a new withdrawal charge period, different investment options, benefits, fees, and risks.**

The Performance Cap Rates we set will limit the amount you can earn on a Segment. Our minimum Performance Cap Rate for a 1-year Segment is 4% (12% for 3-year Segments, and 20% for 5-year Segments). We will not open a Segment with a Performance Cap Rate below the applicable minimum Performance Cap Rate.

The contract is not a short-term investment and is not appropriate for an investor who needs ready access to cash. Withdrawals could result in withdrawal charges, negative contract adjustments, taxes, and tax penalties. This contract permits ongoing withdrawals from the index options prior to the end of the term. These ongoing deductions could have adverse effects of values under the contract and if an investor intends to elect such ongoing withdrawals, they should consult with their financial professional about the appropriateness of the contract for them. Withdrawals, because of the Segment Interim Value Calculation could significantly reduce contract values and by substantially more than the actual amount of the deduction. **Because the end-of-term downside protection provided by a Segment Buffer does not apply to the Segment Interim Value, it is theoretically possible that you could lose up to 100% of your investment and previously credited interest in certain extreme scenarios as a result of withdrawals.** Any transaction that causes account value to leave a Segment between the Segment Start Date and the Segment Maturity Date will result in a Segment Interim Value calculation. Such transactions include

(1) taking a withdrawal (including a systematic withdrawal, automatic withdrawal, required minimum distribution); (2) transferring account value to a different investment option; (3) deducting account value to pay fees; (4) surrendering or annuitizing your contract; (5) payment of a death claim; and (6) canceling your contract and returning it to us for a refund within your state's "free look" period.

A market value adjustment will apply to withdrawals, transfers, surrender of your contract, or when we make deductions for charges from a fixed maturity option before the maturity date. The actual amount of the Market Value Adjustment is determined by a formula that depends on, among other things, the difference between the rate to maturity that applies to the amount being withdrawn and the rate to maturity in effect at that time for new allocations to that same fixed maturity option, and the length of time remaining until the maturity date. **It is theoretically possible that you could lose up to 100% of your investment and previously credited interest in certain extreme scenarios.**

All guarantees are subject to the Company's financial strength and claims paying ability.

You may cancel your contract within 10 days of receiving it without paying fees or penalties although if you invest in the Structured Investment Option the Segment Interim Value will apply. In some states, this cancellation period may be longer. Upon cancellation, you will receive either a full refund of the amount you paid with your application or your account value. You should review the prospectus, or consult with your investment professional, for additional information about the specific cancellation terms that apply.

We reserve the right to stop accepting any application or contribution from you at any time, including after you purchase the contract. If you have one or more guaranteed benefits and we exercise our right to discontinue the acceptance of, and/or place additional limitations on, contributions to the contract, you may no longer be able to fund your guaranteed benefit(s). This means that if you have already funded your guaranteed benefits, you may no longer be able to increase your account value or your guaranteed benefit(s) through contributions and transfers.

Additional information about certain investment products, including variable annuities and index linked annuities, has been prepared by the Securities and Exchange Commission's staff and is available at Investor.gov.

Overview of the contract

Purpose of the Contract

The contract is designed to help you accumulate assets through investments in underlying Portfolios, guaranteed interest option, fixed maturity options and the SIO during the accumulation phase. It can provide or supplement your retirement income by providing a stream of income payments during the annuity phase. It also provides death benefits to protect your beneficiaries and living benefits to protect your access to income. The contract may be appropriate if you have a long-term investment horizon. It is not intended for people who may need to access invested funds within a short-term timeframe or frequently, or who intend to engage in frequent transfers of the underlying Portfolios or Segments.

Phases of the Contract

The contract has two phases: an accumulation (savings) phase and an income (annuity) phase.

Accumulation (Savings) Phase

During the accumulation phase, you can allocate your contributions to one or more of the available investment options, which include:

- Personal Income Benefit variable investment options (used to fund the Personal Income Benefit);
- Variable investment options;
- Guaranteed interest option;
- Fixed maturity options;
- Segments of the SIO, which are index-linked investment options;
- Dollar cost averaging; and
- Access to the optional Semester Strategies program.

We will credit positive or negative interest to amounts allocated to a Segment of the SIO on the Segment Maturity Date based, in part, on the performance of the applicable Index from the Segment Start Date to the Segment Maturity Date. You could lose a significant amount of money if the external index declines in value. Each Segment uses a Performance Cap Rate to limit upside performance and a Segment Buffer to limit downside performance.

We limit the negative Index Performance Rate used in calculating the Segment Rate of Return of a Segment on the Segment Maturity Date by applying the Segment Buffer to absorb negative Index Performance up to the amount of the Segment Buffer. The Segment Buffer is the maximum amount of negative interest we will assume. We will credit any additional negative interest in excess of the Segment

Buffer. **You could lose as much as 80% (for Segments with a -20% Segment Buffer) to 90% (for Segments with a -10% Segment Buffer) of your principal and previously credited interest due to negative index performance at Segment maturity, depending on the Segment Buffer applicable to the Segment in which you invest. The cumulative loss over the life of the contract could be much greater. There is a risk of a substantial loss of your principal and previously credited interest if the index declines because you agree to absorb all losses to the extent they exceed the applicable Segment Buffer.** For example, if the Index Performance Rate is -25% and the Segment Buffer is -10%, the Segment Rate of Return that we credit would be -15% (the amount that the Index Performance Rate exceeds the Segment Buffer) on the Segment Maturity Date, meaning that your Segment Maturity Value will show a 15% decrease from your Segment Investment. We do not guarantee that the contract will always offer Segments that limit Index losses.

We limit the positive Index Performance Rate used in calculating the Segment Rate of Return of a Segment on the Segment Maturity Date by applying the Performance Cap Rate to limit Index Performance to no more than the amount of the Performance Cap Rate. For example, if the Index Performance Rate is 12% and the Performance Cap Rate is 4%, the Segment Rate of Return that we credit would be 4% (the lesser of the Index Performance Rate and the Performance Cap Rate) on the Segment Maturity Date, meaning that your Segment Maturity Value will show a 4% increase from your Segment Investment. We will not establish a Performance Cap Rate below 4%, 12%, and 20% for a 1, 3, and 5-year Segment, respectively.

For additional information about each investment option see Appendix: "Investment options available under the contract".

Income (Annuity) Phase

You enter the income phase when you annuitize your contract. During the income phase, you will receive a stream of fixed income payments for the annuity payout period of time you elect. You can elect to receive annuity payments (1) for life; (2) for life with a certain minimum number of payments; (3) for life with a certain minimum number of payments to the beneficiary upon the death of the annuitant; or (4) for life with a certain amount of payment. Please note that when you annuitize, your investments are converted to income payments and you will no longer be able to make any additional withdrawals from your contract. All accumulation phase benefits, including any death benefit, enhanced death benefit, and Personal Income Benefit, terminate upon annuitization and the contract has a maximum annuity commencement date.

Contract Features

The contract provides for the accumulation of retirement savings and income. The contract offers income, optional living benefits, death benefit protection and offers various payout options.

Death Benefits

During the accumulation phase, your contract includes a standard death benefit that pays your beneficiaries an amount equal to at least your contributions less adjusted withdrawals and outstanding loan balances and accrued interest. For an additional fee, you can purchase the enhanced death benefit which guarantees beneficiaries will receive a benefit that is at least equal to your highest adjusted account value on specified anniversaries. Once elected at enrollment, the enhanced death benefit cannot be canceled.

Living Benefits

A living benefit called the Personal Income Benefit ("PIB") is only available for contracts issued before November 10, 2023, for an additional charge should you elect it. The PIB is a benefit that guarantees, subject to certain restrictions, an annual withdrawal amount.

Rebalancing and Dollar Cost Averaging

You can elect to have your account value automatically rebalanced at no additional charge. We offer two rebalancing programs that you can use to automatically reallocate your account value among your variable investment options and the guaranteed interest option. You can also elect to allocate your investments using a dollar cost averaging program at no additional charge. Generally, you may not elect both a dollar cost averaging program and a rebalancing option. Rebalancing is not available for amounts allocated to the Personal Income Benefit variable investment options.

Contract Loans

Depending on the terms of your contract, you may be permitted to take loans from your account value. If you take a loan we charge interest on the loan.

Access to Your Money

During the accumulation phase you can take withdrawals from your contract. Withdrawals will reduce your account value, be subject to the Segment Interim Value calculation, and may be subject to surrender charges, adjustment for Segment Interim Values, and income taxes, as well as a tax penalty. Withdrawals may also reduce your death benefit (possibly on a greater than dollar-for-dollar basis) and may terminate your enhanced death benefit.

Contract Adjustments

We use the Segment Interim Values for your Segments of the SIO if you make any withdrawals (including surrender or termination of your contract, or when we make deductions

for charges, or if you take a loan) or upon payment of a death benefit from a Segment on any date prior to the Segment Maturity Date. These withdrawals may also be subject to withdrawal charges, taxes, and possible tax penalties. This amount may be less than the amount invested and may be less than the amount you would receive had you held the investment until maturity. The Segment Interim Value will generally be negatively affected by increases in the expected volatility of index prices, interest rate increases, and by poor market performance. All other factors being equal, the Segment Interim Value would be lower the earlier a withdrawal or surrender is made during a Segment. Also, for all contracts using a Performance Cap Rate limiting factor, participation in upside performance for early withdrawals is pro-rated based on the period those amounts were invested in a Segment. This means you participate to a lesser extent in upside performance the earlier you take a withdrawal.

If you make any withdrawals (including transfers, surrender or termination of your contract, or when we make deductions for charges) from a fixed maturity option before it matures, we will make a market value adjustment, which will increase or decrease any fixed maturity amount you have in that fixed maturity option. The amount of the adjustment will depend on two factors:

- (a) the difference between the rate to maturity that applies to the amount being withdrawn and the rate to maturity in effect at that time for new allocations to that same fixed maturity option, and
- (b) the length of time remaining until the maturity date.

In general, if interest rates rise from the time that you originally allocate an amount to a fixed maturity option to the time that you take a withdrawal, the market value adjustment will be negative. Likewise, if interest rates drop at the end of that time, the market value adjustment will be positive. Also, the amount of the market value adjustment, either up or down, will be greater the longer the time remaining until the fixed maturity option's maturity date. Therefore, it is possible that the market value adjustment could greatly reduce your value in the fixed maturity options, particularly in the fixed maturity options with later maturity dates.

Important information you should consider about the contract

FEES, EXPENSES, AND ADJUSTMENTS

Are There Charges or Adjustments for Early Withdrawals?

Yes. If you surrender your contract, apply your cash value to a non-life contingent annuity payment option, or withdraw money from the contract for up to 10 years following your last contribution, or during the first ten participation years depending on your plan, you will be assessed a withdrawal charge of up to 6% of account value withdrawn or contributions withdrawn. For example, if you make a withdrawal in the first year, you could pay a withdrawal charge of up to \$6,000 on a \$100,000 investment. This loss will be greater if there is a negative interim value adjustment, negative market value adjustment, and/or if you have to pay taxes or tax penalties.

There is an interim value adjustment for amounts removed from a Segment of the SIO before Segment maturity and because the end-of-term downside protection provided by a Segment Buffer does not apply to the Segment Interim Value, it is theoretically possible that you could lose up to 100% of your investment and previously credited interest in certain extreme scenarios. For example, if you allocate \$100,000 to a Segment with a 3-year Segment Duration and later withdraw the entire amount before the 3 years have elapsed, you could lose up to \$100,000 of your investment. This loss may be greater if you also have to pay a withdrawal charge, taxes and tax penalties. We use the Segment Interim Values for your Segments of the SIO if you make any withdrawals (including surrender or termination of your contract, or when we make deductions for charges, or if you take a loan) or upon payment of a death benefit from a Segment on any date prior to the Segment Maturity Date.

If amounts are removed from a fixed maturity option before the maturity date, there will be a market value adjustment which could greatly reduce the value in your fixed maturity option theoretically by up to 100% in extreme situations. For example, if you allocate \$100,000 to a fixed maturity option and later withdraw the entire amount before the maturity date, you could lose up to \$100,000 of your investment. This loss may be greater if you also have to pay a withdrawal charge, taxes and tax penalties. A market value adjustment will apply to withdrawals, transfers, surrender of your contract, or when we make deductions for charges from a fixed maturity option before the maturity date.

For additional information about the charges for surrenders and early withdrawals see "Withdrawal charge" in "Charges under the contracts" under "Charges, expenses, and adjustments" in the prospectus.

Are There Transaction Charges?

Yes. In addition to withdrawal charges, interim value adjustments and market value adjustments, you may also be charged for other transactions including loans and for special requests such as wire transfers, express mail, duplicate contracts, preparing checks, or third-party transfers or exchanges.

For additional information about transaction charges see "Charges under the contracts" in "Charges, expenses, and Adjustments" in the prospectus.

Are There Ongoing Fees and Expenses?

Yes. The contract provides for different ongoing fees and expenses. The table below describes the fees and expenses that you may pay *each year*, depending on the investment options and optional benefits you choose. Please refer to your contract specifications page of your certificate for information about the specific fees you will pay *each year* if you have elected the PIB. **Although we do not charge you a direct fee to invest in the Segments under the SIO, there is an implicit ongoing fee associated with Segments because the amount you can earn on a Segment is limited by us by the Segment's Performance Cap Rate. The Performance Cap Rate may cause your returns under the Segment to be lower than the Index's returns. In return for accepting this limit on Index gains, you receive some protection from Index losses through the Segment Buffer. The implicit ongoing fee from the Performance Cap Rate is not reflected in the tables below.**

Annual Fee	Minimum	Maximum
Base Contract ⁽¹⁾	0.25%	1.20%
Portfolio Company fees and expenses ⁽²⁾	0.55%	2.85%
Optional benefits available for an additional charge (for a single optional benefit, if elected) ⁽³⁾	0.15%	1.00%

(1) Expressed as an annual percent of daily net assets in the variable investment options.

(2) Expressed as an annual percentage of daily net assets in the Portfolio. This range is for the year ended December 31, 2024 and could change from year to year.

(3) Depending on the benefit elected, the charge may be expressed as an annual percentage of your account value (in case of the Enhanced death benefit), or as an annual percentage of the Personal Income Benefit account value (in case of the Personal Income Benefit).

Because your contract is customizable, the choices you make affect how much you will pay. To help you understand the cost of owning your contract, the following table shows the lowest and highest cost you could pay *each year*, based on current charges. This estimate assumes that you do not take withdrawals from the contract, **which could add withdrawal charges, interim value adjustments and market value adjustments that substantially increase costs (the Segment Interim Value adjustment is zero for both the highest and lowest annual cost).**

Lowest Annual Cost \$910	Highest Annual Cost \$3,489
Assumes:	Assumes:
<ul style="list-style-type: none"> Investment of \$100,000 5% annual appreciation Least expensive combination of contract and Portfolio fees and expenses No optional benefits No sales charges No additional contributions, transfers, loans or withdrawals No contract adjustments 	<ul style="list-style-type: none"> Investment of \$100,000 5% annual appreciation Most expensive combination of contract, optional benefits (Personal Income Benefit and Enhanced death benefit option) and Portfolio fees and expenses No sales charges No additional contributions, transfers, loans or withdrawals No contract adjustments

For additional information about ongoing fees and expenses see "Fee table" in the prospectus.

RISKS

Is There a Risk of Loss from Poor Performance?

Yes. The contract is subject to the risk of loss. You could lose some or all of your account value, depending on the investment options you choose.

The return on the Segments of the SIO may be negative and there is a risk of substantial loss of your principal and previously credited interest due to negative index performance because you agree to absorb all losses to the extent they exceed the Segment Buffer. **You could lose as much as 80% (for Segments with a -20% Segment Buffer) to 90% (for Segments with a -10% Segment Buffer) of your principal and previously credited interest due to negative index performance at Segment maturity, depending on the Segment Buffer applicable to the Segment in which you invest.** We do not guarantee that the contract will always offer Segments that limit Index losses, which would mean risk of loss of the entire amount invested in the SIO. The cumulative loss over the life of the contract could be much greater.

For additional information about the risk of loss see "Principal risks of investing in the contract" in the prospectus.

Is this a Short-Term Investment?

No. The contract is not a short-term investment and is not appropriate for an investor who needs ready access to cash because the contract is designed to provide for the accumulation of retirement savings and income on a long-term basis. As such, you should not use the contract as a short-term investment or savings vehicle. A withdrawal charge may apply in certain circumstances and any withdrawals may also be subject to federal and state income taxes and tax penalties. Withdrawals from a Segment of the SIO or a fixed maturity option prior to maturity may result in an interim value adjustment or market value adjustment, respectively. Amounts removed from a Segment prior to the Segment Maturity Date will not receive Index interest, and may result in a negative Segment Interim Value adjustment which could reduce the Segment Investment by significantly more than the amount withdrawn. Likewise, amounts removed from a fixed maturity option will not receive credited interest, and may result in a negative market value adjustment which could be significantly greater than the amount withdrawn. Contract value in a Segment will be reallocated at Segment Maturity according to your instructions. If you have not provided us with maturity instructions, the Segment Maturity Value will be transferred to the

Segment Holding Account. Your Segment Maturity Value would then be transferred from that Segment Holding Account into the next Segment on the Segment Start Date. If the next Segment to be created would not meet the Segment Maturity Date Requirement or the Segment Type has been terminated, we will instead transfer your Segment Maturity Value to the EQ/Money Market variable investment option. Alternatively, if you designate a Performance Cap Threshold that is not met on the next Segment Start Date or if the Segment Type has been suspended, your Segment Maturity Value will remain in the Segment Holding Account. If you are impacted by these delays, you may transfer your Segment Maturity Value out of the Segment Holding Account into any other investment options available under your EQUI-VEST® contract at any time before the next month's Segment Start Date.

For additional information about the investment profile of the contract see "Fee table" in the prospectus.

What Are the Risks Associated with the Investment Options?

An investment in the contract is subject to the risk of poor investment performance and can vary depending on the performance of the investment options available under the contract, (e.g., the Portfolios) or Segment of the SIO. Each investment option, including the guaranteed interest option and fixed maturity options, has its own unique risks. You should review the investment options before making an investment decision.

For investments in a Segment of the SIO, the Performance Cap Rate will limit positive Index performance (e.g., limited upside). For example, if the Index Performance Rate is 10% and the Performance Cap Rate is 7%, we will credit 7% on the Segment Maturity Date assuming there are no fees or charges assessed. **This may result in you earning less than the Index Return.**

The Segment Buffer will limit negative returns (e.g., limited protection in the case of market decline). The Segment Buffer is the maximum amount of negative interest we will assume and we will credit any negative interest in excess of the Segment Buffer which means you bear all loss that exceeds the Segment Buffer. For example, if the Index Performance Rate is -25% and the Segment Buffer is -10%, we will credit -15% on the Segment Maturity Date assuming there are no fees or charges assessed.

Each Index is a "price return index," not a "total return index," and therefore does not reflect dividends paid on the securities composing the Index. This will reduce the Index return and will cause the Index to underperform a direct investment in the securities composing the Index.

For additional information about the risks associated with investment options see "Risks associated with the variable investment options", "Risks associated with the Structured Investment Option," and "Risks associated with the fixed maturity options" in "Principal Risks of investing in the contract." See also Appendix: "Investment options available under the contract" in the prospectus.

What Are the Risks Related to the Insurance Company?

An investment in the contract is subject to the risks related to the Company. The Company is solely responsible to the contract owner for the contract's account value and the Guaranteed benefits. The general obligations including the guaranteed interest option, fixed maturity options, SIO and any Guaranteed benefits under the contract are supported by our general account and are subject to our claims paying ability. An owner should look solely to our financial strength for our claims-paying ability. More information about the Company, including our financial strength ratings, may be obtained at www.equitable.com/about-us/financial-strength-ratings.

For additional information about insurance company risks see "About the general account" in "More information" in the prospectus.

RESTRICTIONS

Are There Restrictions on the Investment Options?

Yes. We may, at any time, exercise our rights to limit or terminate your contributions, allocations and transfers to any of the variable investment options (including the Personal Income Benefit account variable investment options) and to limit the number of variable investment options which you may select. Such rights include, among others, removing or substituting the Portfolios, combining any two or more variable investment options and transferring the account value from any variable investment option to another variable investment option.

There are restrictions regarding investment options if Guaranteed benefits are elected, limits on contributions and transfers into and out of the guaranteed interest option, and restrictions or limitations with the DCA program. See "Allocating your contributions" in "Purchasing the Contract" and "Transferring your account value" in "Transferring your money among investment options" in the prospectus for more information.

For more information see “About the Separate Account” in “More information” in the prospectus.

You must choose one of the two investment methods: 1) Maximum investment option choice, or 2) Maximum transfer flexibility. For more information please see “Selecting your investment method” in the prospectus. We determine the Performance Cap Rate for each SIO Segment on the Segment Start Date. You will not know the rate in advance. Prior to the Segment Start Date, you may elect a Performance Cap Threshold. The threshold represents the minimum Performance Cap Rate you find acceptable for a particular Segment. If we declare a cap that is lower than the threshold you specify, you will not be invested in that Segment and your account value will remain in that Segment Holding Account until the next available Segment for which your threshold is met or you provide us with alternative instructions. You cannot transfer out of an SIO Segment prior to its maturity to another investment option. You can only make withdrawals out of a Segment or surrender your EQUI-VEST® contract. The amount you would receive would be calculated using the formula for the Segment Interim Value. We may not offer new SIO Segments. Therefore, a Segment may not be available for you to transfer your Segment Maturity Value into after the Segment Maturity Date. We have the right to substitute an alternative index prior to Segment Maturity if the publication of the Index is discontinued or at our sole discretion we determine that our use of the Index should be discontinued or if the calculation of the Index is substantially changed. If we substitute an index for an existing Segment, we would not change the Segment Buffer or Performance Cap Rate. We would attempt to choose a substitute index that has a similar investment objective and risk profile to the replaced index. We will not accept allocations to a fixed maturity option if on the date the contribution or transfer is to be applied the rate to maturity is 3%. This means that at points in time there may be no fixed maturity options available. You can allocate your contributions to one or more of these fixed maturity options. However, you may not allocate more than one contribution to any one fixed maturity option. Contributions and transfers into and out of the guaranteed interest option are limited.

For additional information about the restrictions on investment options, see “Portfolios of the Trusts,” “Structured Investment Options,” “Guaranteed Interest Option” and “Fixed maturity options” in “Purchasing the Contract” and “Transferring your money among investment options” in the prospectus.

Are There Any Restrictions on Contract Benefits?

Yes. At any time, we have the right to limit or terminate your contributions, allocations and transfers to any of the variable investment options. If you have funded the Personal Income Benefit (which is also known as the optional benefit) and we exercise our right to discontinue the acceptance of, and/or place additional limitations on, contributions to the contract and/or contributions and/or transfers into the Personal Income Benefit variable investment options, you may no longer be able to fund your Personal Income Benefit. Not all employer plans will offer loans. Loans are subject to restrictions under federal tax rules and ERISA. Automated transfer programs, including dollar cost averaging and asset rebalancing, are not available if you elect Semester Strategies.

Investment options are limited if Guaranteed benefits are elected. Withdrawals that exceed limits specified by the terms of an optional benefit may affect the availability of the benefit by reducing the benefit by an amount greater than the value withdrawn, and/or may terminate the benefit.

The standard and optional death benefits offered with the contract are available only at contract purchase. Withdrawals could significantly reduce or terminate the death benefit.

For additional information about the optional benefits see “How you can contribute to your certificate” in “Purchasing the Contract” in the prospectus. See also “Personal Income Benefit,” “Death benefits” and “Optional Semester Strategies program” in “Other Benefits” in “Benefits available under the contract” in the prospectus.

TAXES

What are the Contract’s Tax Implications?

You should consult with a tax professional to determine the tax implications of an investment in, and payments received under, the contract. There is no additional tax benefit to you if the contract is purchased through a tax-qualified plan or individual retirement account (IRA). Withdrawals will be subject to ordinary income tax and may be subject to tax penalties. Generally, you are not taxed until you make a withdrawal from the contract.

For additional information about tax implications see “Tax information” in the prospectus.

CONFLICTS OF INTEREST

How are Investment Professionals Compensated?

Some financial professionals may receive compensation for selling the contract to you, both in the form of commissions or in the form of contribution-based compensation. Financial professionals may also receive additional compensation for enhanced marketing opportunities and other services (commonly referred to as “marketing allowances”). This conflict of interest may influence the financial professional to recommend this contract over another investment.

For additional information about compensation to financial professionals see “Distribution of the contracts” in “More information” in the prospectus.

Should I Exchange My Contract?

Some financial professionals may have a financial incentive to offer a new contract in place of the one you already own. You should only exchange your contract if you determine, after comparing the features, fees, and risks of both contracts, as well as any fees or penalties to terminate your existing contract, that it is preferable to purchase the new contract rather than continue to own your existing contract.

For additional information about exchanges see "Charge for third-party transfer or exchange" in "Charges, expenses, and adjustments" in the prospectus.

Benefits available under the contract

Summary of Benefits

The following tables summarize important information about the benefits available under the contract.

Death benefits

These death benefits are available during the accumulation phase:

Name of Benefit	Purpose	Standard/ Optional	Annual Fee Max Current		Brief Description of Restrictions/ Limitations
Death benefit	Guarantees beneficiaries will receive a benefit at least equal to your contributions less adjusted withdrawals and the amounts of any outstanding loans and accrued interest.	Standard	No Additional Charge		<ul style="list-style-type: none">Withdrawals could significantly reduce or terminate benefit
Enhanced death benefit	Guarantees beneficiaries will receive a benefit at least equal to your highest adjusted account value on specified anniversaries.	Optional	0.15% ⁽¹⁾	0.15% ⁽¹⁾	<ul style="list-style-type: none">Available only at contract purchaseRestricted to owners between the ages of 45 and 85You may not cancel once you elect this benefitWithdrawals could significantly reduce or terminate benefitIf elected, you will not get the standard Death benefit

(1) Expressed as a percentage of your account value.

Other benefits

These other benefits are available during the accumulation phase:

Name of Benefit	Purpose	Standard/ Optional	Annual Fee Max Current		Brief Description of Restrictions/ Limitations
Rebalancing Option I ⁽¹⁾ and Option II ⁽²⁾	Periodically rebalance to your desired asset mix.	Optional	No Charge		<ul style="list-style-type: none">Not generally available with Dollar Cost Averaging
Dollar Cost Averaging and Investment Simplifier	Transfer account value to selected investment options on a regular basis to potentially reduce the impact of market volatility.	Optional	No Charge		<ul style="list-style-type: none">Not generally available with Rebalancing
Semester Strategies program	We offer access to account services through SWBC Investment Advisory Services LLC ("SWBC"), an unaffiliated third party. SWBC is an independent registered investment advisory firm that assists retirement plan participants with investment advisory services, including model portfolio services.	Optional	No Charge		<ul style="list-style-type: none">To participate in the Program, you are required to use the Maximum investment options choice methodNot available with Dollar Cost Averaging or Rebalancing
Participant Loans	Loans may be available to plan participants	Optional	2.00%; calculated as a percentage of the outstanding loan amount		<ul style="list-style-type: none">Not all employer plans will offer loansLoans are subject to restrictions under federal tax laws and ERISA

(1) Option I allows you to rebalance your account value among the variable investment options.

(2) Option II allows you to rebalance your account value among the variable investment options and the guaranteed interest option.

Buying the Contract

You may purchase a contract by making payments to us that we call “contributions.” We can refuse to accept an application from you or any contribution from you at any time, including after you purchase the contract. We require a minimum contribution amount for each type of contract purchased. Maximum contribution limitations also apply.

Maximum issue age

The maximum issue age for an annuitant is 85.

Minimum initial and subsequent contribution amounts

The minimum initial contribution is generally \$20 for each type of contract. Subsequent contributions are allowed up to a certain maximum contribution limit.

Limitations on contributions to the contract

We reserve the right to refuse to accept any contribution under the contract at any time or change our contribution limits and requirements. This means that if you have one or more Guaranteed benefits and we exercise our right to discontinue the acceptance of contributions to the contract you may no longer be able to fund your Guaranteed benefits. This means that you may no longer be able to increase your Guaranteed benefits.

When initial and subsequent contributions are credited

Initial Contribution

For certain employer-remitted salary reduction contracts, it is possible that we may receive your initial contribution prior to Equitable Advisors, LLC (Equitable Financial Advisors in Michigan and Tennessee), (“Equitable Advisors”) receiving your application. In this case, we will hold the contribution, whether received via check or wire, in a non-interest bearing “Special Bank Account for the Exclusive Benefit of Customers.” If Equitable Advisors does not receive your application within 20 business days, we will return your contribution to your employer or its designee.

If Equitable Advisors receives your application within this timeframe, Equitable Advisors will direct us to continue to hold your contribution in the special bank account noted immediately above while Equitable Advisors ensures that your application is complete and suitability standards are met. Equitable Advisors will either complete this process or instruct us to return your contribution to your employer or its designee within the applicable Financial Industry Regulatory Authority (“FINRA”) time requirements. Upon timely and successful completion of this review, Equitable Advisors will instruct us to transfer your contribution into our non-interest bearing suspense account and transmit your application to us, so that we can consider your application for processing.

If your application is in good order when we receive it for application processing purposes, your contribution will be applied within two business days. If any information we require to issue your contract is missing or unclear, we will hold your contribution while we try to obtain this information. If we are unable to obtain all of the information we require within five business days after we receive an incomplete enrollment form, we will inform the financial professional submitting the application on your behalf. We will then return the contribution to your employer or its designee, unless you or your financial professional acting on your behalf, specifically direct us to keep your contribution until we receive the required information. The contribution will be applied as of the date we receive the missing information.

Subsequent Contributions

If we receive a subsequent contribution before the close of the NYSE (typically 4:00 pm eastern), we will credit that contribution that day. If we receive your subsequent contribution after the close of the NYSE, your contribution will be applied the next business day.

Additional limitations on contributions to the contract

Additional limitations on contributions and the source of contributions apply based on the type of contract, such as TSA or EDC contracts. Please see the tables in the “How you can contribute to your certificate” in “Purchasing the Contract” to the prospectus for detailed information. You can obtain the prospectus by calling the number or accessing the website noted on the first page of this summary prospectus.

Making Withdrawals: Accessing the Money in Your Contract

Accessing your money

You have several ways to access your account value before annuity payments begin. Generally, you may take partial withdrawals from your contract at any time or, depending on your specific situation, set up an automatic payment plan, a systematic withdrawal plan, a substantially equal withdrawals plan or a lifetime RMD payments plan. Additionally, you may take a loan (if permitted by your Plan). You may also surrender your contract to receive its cash value at any time. If we receive a withdrawal or surrender request in good order before the close of the NYSE (typically 4:00 pm eastern), we will process the request that day. If we receive the request after the close of the NYSE, we will process the request on the next business day. We will generally send you the full requested withdrawal amount and deduct any applicable withdrawal charges from account value unless your request otherwise.

Withdrawals will reduce your account value and may be subject to withdrawal charges, income taxes and a tax penalty. Withdrawals may also reduce (possibly on a greater than dollar-for-dollar basis) or terminate any optional guaranteed benefits. Surrenders also may be subject to withdrawal charges, income taxes and a tax penalty if you are younger than 59½.

Please see "Accessing your money" in the prospectus for more information on the ways you may withdraw your account value.

Free withdrawal amount

Each contract year you can withdraw a certain amount from your contract without paying a withdrawal charge.

When to expect payments

Generally, we will fulfill requests for payments out of the variable investment options within seven calendar days after the date of the transaction to which the request relates. These transactions may include applying proceeds to a variable annuity payout option, payment of a death benefit, payment of any amount you withdraw (less any withdrawal charge) and, upon certificate termination, payment of the cash value.

Additional Information About Fees

The following tables describe the fees, expenses, and adjustments that you will pay when buying, owning, surrendering, or making withdrawals from an investment option or from the certificate. Please refer to your contract specifications page for information about the specific fees you will pay *each year* based on the options you have elected.

The first table describes fees and expenses that you will pay at the time that you buy the contract, surrender the contract, or make certain withdrawals from an investment option or from the certificate, or transfer account value between investment options. Charges designed to approximate certain taxes that may be imposed on us, such as premium taxes in your state, may also apply.

Transaction Expenses	
Sales Load Imposed on Purchases (as a percentage of purchase payments)	None
Withdrawal Charge (as a percentage of the amount withdrawn) ⁽¹⁾	6.00%
Net Loan Interest Charge ⁽²⁾	2.00%
Transfer Fee	None
Third Party Transfer or Exchange Fee ⁽³⁾	\$65
Special Service Charges ⁽⁴⁾	\$90

- (1) The charge percentage is deducted upon a withdrawal of amounts in excess of the 10% free withdrawal amount. Important exceptions and limitations may eliminate or reduce this charge. For a complete description of charges, please see "Withdrawal charges" in "Charges, expenses, and adjustments" in the prospectus. See Appendix: "State contract availability and/or variations of certain features and benefits" in the prospectus for more information.
- (2) In no event will the net loan interest charge exceed 2.00%. We charge interest on loans under your certificate but also credit you interest on your loan reserve account. Our net loan interest charge is determined by the excess between the interest rate we charge over the interest rate we credit. See "Loans" under "Accessing your money" in the prospectus for more information on how the loan interest is calculated and for restrictions that may apply.
- (3) This charge will never exceed 2% of the amount disbursed or transferred. We may discontinue these services at any time.
- (4) Unless you specify otherwise, this charge will be deducted from the amount you request. Special service charges include (1) express mail charge; and (2) wire transfer charge. The current maximum charge for each service is \$90. We may discontinue these services at any time.

The next table describes the adjustments, in addition to any transaction expenses, that apply if all or a portion of the account value is removed from an investment option or from the certificate before the expiration of a specified period.

Adjustments	
SIO Segment Maximum Potential Loss Due to Interim Value adjustment (as a percentage of Account value invested in the Segment on the Segment Start Date) ⁽¹⁾	100% ⁽²⁾
Fixed Maturity Option Maximum Potential Loss Due to Market Value Adjustment (as a percentage of Account value withdrawn from the Fixed Maturity Option) ⁽³⁾	100%

- (1) We use the Segment Interim Values for your Segments of the SIO if you make any withdrawals (including surrender or termination of your contract, or when we make deductions for charges, or if you take a loan) or upon payment of a death benefit from a Segment on any date prior to the Segment Maturity Date. The actual amount of the Segment Interim Value calculation is determined by a formula that depends on, among other things, the Segment Buffer and how the Index has performed since the Segment Start Date. The maximum loss would occur if there is a total distribution for a Segment at a time when the Index price has declined to zero. If you surrender or cancel your variable annuity contract, die, transfer or make a withdrawal from a Segment before the Segment Maturity Date, the Segment Buffer will not necessarily apply to the extent it would on the Segment Maturity Date, and any upside performance will be limited to a percentage lower than the Performance Cap Rate. See "Structured Investment Option" under "Purchasing the contract" for more information.
- (2) Because the end-of-term downside protection provided by a Segment Buffer does not apply to the Segment Interim Value, it is theoretically possible that you could lose up to 100% of your investment and previously credited interest in certain extreme scenarios.
- (3) A market value adjustment will apply to withdrawals, transfers, surrender of your contract, or when we make deductions for charges from a fixed maturity option before the maturity date. The actual amount of the Market Value Adjustment is determined by a formula that depends on, among other things, the difference between the rate to maturity that applies to the amount being withdrawn and the rate to maturity in effect at that time for new allocations to that same fixed maturity option, and the length of time remaining until the maturity date. It is theoretically possible that you could lose up to 100% of your investment and previously credited interest in certain extreme scenarios. In general, the maximum loss would occur if there is a total distribution for a fixed maturity option a significant time prior to the maturity date and interest rates have risen dramatically from the time that you originally allocate an amount to the fixed maturity option to the time that you take the withdrawal. See "Fixed maturity options" under "Purchasing the contract" for more information.

The next table describes the fees and expenses that you will pay *each year* during the time that you own the contract (not including Portfolio fees and expenses). If you choose to purchase an optional benefit, you will pay additional charges, as shown below.

Annual Contract Expenses	
Annual Administrative Charge ⁽¹⁾	\$65 ⁽²⁾
Base Contract Expenses (as an percentage of daily net assets in the variable investment options) ⁽³⁾	1.20%
Optional Benefits Expenses	
Personal Income Benefit charge (as a percentage of your Personal Income Benefit account value)	1.00%
Enhanced death benefit charge (as a percentage of your account value) ⁽⁴⁾	0.15%

- (1) Depending on your Employer's plan, we may be instructed to withdraw a plan operating expense charge from your account value for administrative and record-keeping services related to your certificate. The charge is determined through an arrangement between your Employer and a third party. We will remit the amount withdrawn to either your Employer or your Employer's designee. Please refer to your certificate for more information.
- (2) The Annual administrative charge is the lesser of a current charge of \$30 (maximum \$65) or 2% of your account value plus any prior withdrawals during the participation year. The annual administrative charge is deducted from your account value on each participation date anniversary. If the certificate is surrendered or annuitized, or a death benefit is paid, or the benefit is dropped on any date other than your participation date anniversary, we will deduct a pro rata portion of the charge for that year.
- (3) The current range for the Base Contract Expenses is 0.25% to 1.20%.
- (4) Deducted annually on each participation date anniversary for which the benefit is in effect. If the certificate is surrendered or annuitized, or a death benefit is paid, or the benefit is dropped (if applicable), on any date other than the participation date anniversary, we will deduct a pro rata portion of the charge for that year.

In addition to the fees described above, we limit the amount you can earn on a Segment of the SIO. This means your returns may be lower than the Index's returns. In return for accepting this limit on Index gains, you will receive some protection from Index losses.

The next item shows the minimum and maximum total operating expenses charged by the underlying Portfolios that you may pay periodically during the time that you own the contract. Expenses shown may change over time and may be higher or lower in the future. A complete list of Portfolios available under the contract, including their annual expenses, may be found at the back of this document. See "Appendix: Investment options available under the contract."

Annual Portfolio Expenses	Minimum	Maximum
Annual Portfolio Expenses prior to Expense Limitation Arrangement (expenses that are deducted from Portfolio assets including management fees, 12b-1 fees, service fees and/or other expenses)*	0.55%	2.85%
Annual Portfolio Expenses after Expense Limitation Arrangement (expenses that are deducted from Portfolio assets including management fees, 12b-1 fees, service fees and/or other expenses)**	0.54%	2.57%

* "Annual Portfolio Expenses" may be based, in part, on estimated amounts of such expenses. The expenses listed are for the year ended December 31, 2024.

** "Annual Portfolio Expenses" are based, in part, on estimated amounts of such expenses. The expenses listed are for the year ended December 31, 2024. Pursuant to a contract, Equitable Investment Management Group, LLC has agreed to make payments or waive its management, administrative and other fees to limit the expenses of certain affiliated Portfolios through April 30, 2026 ("Expense Limitation Arrangement") (unless the Trust's Board of Trustees consents to an earlier revision or termination of this agreement). The Expense Limitation Arrangement may be terminated by Equitable Investment Management Group, LLC at any time after April 30, 2026. The Expense Limitation Arrangement does not apply to unaffiliated Portfolios.

Example

This Example is intended to help you compare the cost of investing in the variable investment options with the cost of investing in other annuity contracts that offer variable investment options. The costs include transaction expenses, annual contract expenses, and annual Portfolio expenses.

The Example assumes all Account value is allocated to the variable investment options. The example does not reflect interim value adjustments or market value adjustments. Your costs could differ from those shown below if you invest in Segments of the SIO or the fixed maturity options.

The Example assumes that you invest \$100,000 in the variable investment options for the time periods indicated. The Example also assumes that your investment has a 5% return *each year* and assumes the most expensive combination of annual Portfolio expenses, as well as the Enhanced Death Benefit and Personal Income benefit (both at their maximum charge).

Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

If you surrender your contract or annuitize (under a non-life option) at the end of the applicable time period				If you do not surrender your contract			
1 year	3 years	5 years	10 years	1 year	3 years	5 years	10 years
\$9,842	\$18,804	\$27,873	\$46,244	\$4,410	\$13,308	\$22,312	\$45,289

Appendix: Investment options available under the contract

(a) Variable investment options

The following is a list of Portfolio Companies available under the contract. More information about the Portfolio Companies is available in the prospectuses for the Portfolio Companies, which may be amended from time to time and can be found online at www.equitable.com/ICSR#EQH146654. You can request this information at no cost by calling (877) 522-5035 or by sending an email request to EquitableFunds@dfinsolutions.com. If you elect a Guaranteed benefit, you may only invest in the Portfolios listed in the designated table below.

The current expenses and performance information below reflects fee and expenses of the Portfolios, but do not reflect the other fees and expenses that your contract may charge. Expenses would be higher and performance would be lower if these other charges were included. Each Portfolio's past performance is not necessarily an indication of future performance.

Personal Income Benefit EQ/Conservative Growth Strategy	EQ/Conservative Growth Strategy
Personal Income Benefit EQ/Conservative Strategy	EQ/Conservative Strategy
Personal Income Benefit EQ/Moderate Growth Strategy	EQ/Moderate Growth Strategy
Personal Income Benefit EQ/AB Dynamic Moderate Growth	EQ/AB Dynamic Moderate Growth

(b) Index-Linked Options

The following is a list of Segments of the Structured Investment Option (SIO) currently available under the contract. We may change the features of the Segments listed below (including the Index and current limits on Index gains and losses), offer new Segments, and terminate existing Segments. We will provide you with written notice before making any changes other than changes to current limits on Index gains. Information about current limits on Index gains is available at <https://equitable.com/equiestsio>. See "Structured Investment Option" in "Purchasing the contract" for additional information about the Indices, the Segment Rate of Return calculation methods, and the operation of the Segment Buffer and Performance Cap Rate.

Note: If amounts are removed from a Segment of the SIO before the Segment Maturity Date, we will apply a Contract adjustment based on the Segment Interim Value. This may result in a significant reduction in your account value that could exceed any protection from Index loss that would be in place if you held the option until the Segment Maturity Date.

Index ¹	Type of Index	Segment Duration	Segment Rate of Return Calculation Method	Current Limit on Index Loss (if held until Segment Maturity Date)	Minimum Limit on Index Gain for the life of the Segment Type (Performance Cap Rate)
S&P 500 Price Return Index	Market Index	1 year	Standard	-10% Segment Buffer	4%
S&P 500 Price Return Index	Market Index	3 year	Standard	-20% Segment Buffer	12%
S&P 500 Price Return Index	Market Index	5 year	Standard	-20% Segment Buffer	20%
Russell 2000® Price Return Index	Market Index	1 year	Standard	-10% Segment Buffer	4%
Russell 2000® Price Return Index	Market Index	3 year	Standard	-20% Segment Buffer	12%
Russell 2000® Price Return Index	Market Index	5 year	Standard	-20% Segment Buffer	20%
MSCI EAFE Price Return Index	Market Index	1 year	Standard	-10% Segment Buffer	4%

1 Each reference Index is a "price return index," not a "total return index," and therefore does not reflect dividends paid on the securities composing the Index. This will reduce the Index return and cause the Index to underperform a direct investment in the securities composing the Index.

We do not guarantee that the contract will always offer Segments that limit index losses.

(c) Fixed Investment Options

The following is a list of Fixed investment options currently available under the contract. We may change the features of the Fixed investment options listed below, offer new Fixed investment options, and terminate existing Fixed investment options. We will provide you with written notice before doing so.

Note: If amounts are removed from a Fixed investment option before the end of its term, we may apply a market value adjustment. This may result in a significant reduction in your account value.

Name	Term	Minimum Guaranteed Rate of Interest
Guaranteed Interest Option	N/A	1.0%
Fixed Maturity Options	1 year to 10 years	3.0%
Dollar Cost Averaging	N/A	N/A

For more information, please see "Fixed Maturity Options" and "Guaranteed Interest Option" under "Purchasing the Contract" and "Market Value Adjustment" under "Charges, Fees, and Adjustments in the prospectus."

EQUI-VEST® Strategies (Series 900)

Issued by

Equitable Financial Life Insurance Company of America
Equitable Financial Life Insurance Company

This summary prospectus describes the important features of the contract and provides information about the Company.

We have filed with the Securities and Exchange Commission a prospectus and Statements of Additional Information ("SAI") that include additional information about EQUI-VEST® Strategies (Series 900), Equitable Financial Life Insurance Company of America and Variable Account AA and Equitable Financial Life Insurance Company and Separate Account A, respectively. The prospectus and SAI each dated May 1, 2025, are incorporated by reference into this summary prospectus. The prospectus and SAI are available free of charge. To request a copy of the prospectus and SAI, to ask about your contract, or to make other investor inquiries, please call (800) 628-6673. The prospectus and SAI are also available at our website, www.equitable.com/ICSR#EQH146654.

Class/Contract Identifier: C000247535; C000256150 (EFLOA)
Class/Contract Identifier: C000024809; C000256186 (EFLIC)

DEPARTMENT OF LABOR NOTICE

The Company retains any earnings on amounts held in its general account. These amounts include funds that are pending investment under insurance products as well as funds that have been disbursed from insurance products pending presentment for payment to the client, transferral to another insurance product or mutual fund, if permitted under applicable law, or the client's financial institution. Earnings on such amounts are generally at institutional money market rates. Investment and distribution options are described in the applicable variable insurance product prospectus, as amended to date, which either accompanies this notice or has been previously provided to you.

Generally, funds received in good order before the close of any business day (as defined in the product prospectus) will be credited to the specified investment option effective on that day. Funds that are pending investment include any amounts for which the Company has not yet received adequate instructions, documentation or the completed requirements necessary to enable it to allocate funds as directed by the contract owner. Funds that are awaiting investment will be allocated as directed by the contract owner effective on the business day that falls on or next follows the date the Company receives the completed instructions, documentation or requirements. The Company will receive any investment earnings through the end of the business day on which funds are allocated.

When the Company receives a request for any permissible distribution from an insurance product, which may include requests for partial withdrawals, loans, annuitization or death benefit payments, or full surrenders, as applicable, such distribution will be effective on the date we receive the request in good order. The Company will transfer any applicable separate account amounts to its general account on the process date, regardless of the effective date and send a check to the distributee or commence direct transfer of funds on that date. Amounts will remain in the Company's general account until the date the check is presented for payment or the direct transfer of funds is complete, the timing of which is beyond the Company's control. The Company will receive any investment earnings during the period such amounts remain in the general account. Upon request, the owner of the insurance product may receive from the Company a periodic report summarizing the status of any outstanding distributions, and the length of time such distributions tend to remain outstanding.*

*Not necessary for IRAs.

Important Notice Regarding Delivery of Client Documents

We believe that many of our customers would like us to eliminate duplicate mailings of certain documents to them. We would like to do this too in order to reduce costs and help benefit the environment.

Changes in SEC regulations allow us to send single copies of documents such as Prospectuses, EQ Advisors Trust's Annual and Semi-Annual Reports to our clients who own the same type of variable insurance contract and live at a common address. We began mailing single copies of these documents in 2001.

In the event that you wish to continue receiving multiple mailings of these documents, where a separate copy is sent to each individual contract owner residing at the same address, please call us at 1-877-927-2632 within 60 days.

Thank you for your continued support.
