EQ/Money Market

An investment in the EQ/Money Market portfolio is neither guaranteed nor insured by the U.S. government, the Federal Deposit Insurance Corporation or any other government agency. Although the portfolio seeks to preserve the value of your investment at \$1.00 per unit, it is possible to lose money by investing in the portfolio.

Guaranteed interest option

The guaranteed interest option is part of our general account and pays interest at guaranteed rates. If your initial contribution is \$100,000 or less, no more than 25% of such initial contribution and any additional contributions may be allocated to the guaranteed interest option. If your initial contribution is more than \$100,000, no more than 50% of such initial contribution and any additional contributions may be allocated to the guaranteed interest option.

Important note

Equitable believes education is a key step toward addressing your financial goals, and we've designed this material to serve simply as an informational and educational resource. Accordingly, this brochure does not offer or constitute investment advice, and makes no direct or indirect recommendation of any particular product or of the appropriateness of any particular investment-related option. Your needs, goals and circumstances are unique, and they require the individualized attention of your financial professional.

The **Net Annual Expense** reflects fees that are waived/reimbursed by the investment advisor. These expenses are based on each portfolio's prospectus dated May 1, 2022, or for certain portfolios, the most recent prospectus supplement to the May 1, 2022 prospectus.

The investment objectives and policies of certain funds may be similar to those of other funds managed by the same investment adviser. No representation is made, and there can be no assurance given, that any fund's investment results will be comparable to the investment results of any other fund, including another fund with the same investment adviser or manager.

This piece must be preceded or accompanied by a current prospectus. Please consider the charges, risks, expenses, and investment objectives carefully before purchasing a variable annuity or making an investment option selection.

The EQUI-VEST® variable annuity is a long-term financial product that is generally used for retirement purposes and includes, among other fees and charges, a charge for withdrawals that exceed the free withdrawal amount. The amount of the withdrawal charge we deduct may be up to 6%. In general terms, an annuity is a contractual agreement in which payments are made to an insurance company, which agrees to pay out an income stream or a lump-sum amount at a later date.

An annuity contract that is purchased to fund a qualified retirement plan should be purchased for the annuity's features and benefits other than tax deferral. For such cases, tax deferral is not an additional benefit for the annuity. You may also want to consider the relative features, benefits and costs of this annuity with any other investment that you may have in connection with your retirement plan or arrangement.

Amounts in the annuity's variable investment options are subject to market risk, including the loss of principal. Variable investment options can fluctuate in value and are not guaranteed. Individuals cannot directly invest in an index.

This flyer is not a complete description of the EQUI-VEST® variable annuities. Certain types of benefits may not be available in all jurisdictions.
