VUL Optimize[®] Max is a VUL Optimize[®] policy with a standard plus underwriting class. VUL Optimize[®] Max allows potential insureds to qualify for a standard plus underwriting class without labs, exams or attending physician statement (APS). Traditional underwriting that may require additional items or information, such as labs, exams or APS, is also available, which may result in a better or worse underwriting class.

Equitable Advantage MaxSM offers Equitable AdvantageSM through an expedited digital process that doesn't require labs, exams or an attending physician statement (APS). This illustration has utilized Equitable Advantage MaxSM and is within the appropriate issue age range, face amount and illustrative funding level for qualification. For Equitable Advantage MaxSM, the available underwriting class is select, which is not available through traditional underwriting and is available to non-tobacco users only. Equitable AdvantageSM is available through full traditional underwriting with a different set of risk class outcomes. Depending on the final outcome of the full medical underwriting, the policy values may be better or worse than those illustrated with the select underwriting class.

Under current federal tax rules, clients generally may take federal income tax-free withdrawals up to their basis (total premiums paid) in the policy or loans from a life insurance policy that is not a Modified Endowment Contract (MEC). Certain exceptions may apply for partial withdrawals during the policy's first 15 years. If the policy is a MEC, all distributions (withdrawals or loans) are taxed as ordinary income to the extent of gain in the policy and may also be subject to an additional 10% premature distribution penalty prior to age 59½, unless certain exceptions are applicable. Loans and partial withdrawals will decrease the death benefit and cash value of your clients' life insurance policy and may be subject to policy limitations and income tax. In addition, loans and partial withdrawals may cause certain policy benefits or riders to become unavailable and may increase the chance your client's policy may lapse. If the policy lapses, is surrendered or becomes a MEC, the loan balance at such time would generally be viewed as distributed and taxable under the general rules for distribution of policy cash values.
