PARTICIPANT FEE DISCLOSURE DOCUMENT

Members Retirement Program

Information on the performance, fees and expenses of the investment options available in your retirement plan.

June 26, 2026

Members Retirement Program

Participant Fee Disclosure and Investment Option Information

Our retirement plan is part of the Members Retirement Program which has, for over 50 years, helped assist employees in saving toward retirement. The information provided is intended to be useful in managing your account and assessing your investment options. If you have questions related to the information contained herein or if you need additional information, please contact a Retirement Plan Account Manager at 1-800-526-2701 or visit the program web site at mrppar.equitable.com.

The Department of Labor requires employers to provide participants and beneficiaries with sufficient information, including information on expenses and the available investment options, to allow the participants and beneficiaries to make informed decisions. Some of the information provided in this document is already available to you on the web site and quarterly statements. Nothing in this document is intended to act as a substitute for investment, fee and expense information that is available elsewhere such as the prospectus. Before investing you should review all the information that is available to you and remember that:

- The cumulative effect of fees and expenses can substantially reduce the growth of your retirement savings. Visit the Department of Labor's web site for an example showing the long-term effect of fees and expenses at http://www.dol.gov/ebsa/publications/401k_employee.html. Fees and expenses are only one of many factors to consider when you decide to invest in an option. You may also want to think about whether an investment in a particular option, along with your other investments, will help you achieve your financial goals.

- Past performance does not guarantee future results. For the most up to date information, including performance, on the investment options in the program, please go to mrppar.equitable.com.

- Asset allocation is considered an important tool for successful investing. By diversifying among different types of investment options, you may be able to reach your long-term goals while managing your exposure to market risk. Asset allocation simply means diversifying a portfolio among different asset classes, such as stocks, bonds and cash equivalents, in an effort to manage risk. In order to effectively save for your retirement, you need to pick an investment strategy that's right for you. Your investment strategy can have a significant impact on your income level, especially in the later years of retirement. Whatever you decide, it's important to choose an investment strategy to fit with your risk tolerance and time horizon, whether it entails asset allocation or choosing your own investment mix.

Plan Related Information

A. Providing investment instructions

When you enroll in the program you are required to provide written investment instructions for future contributions and on the enrollment form. These instructions will be utilized for all contributions (both from your Employer and your Salary Deferral (if applicable)) sent to your individual account by your Employer.

You can change your investment instructions for future contributions at any time on the program web site (mrppar.equitable.com), by using the automated voice response system, or by completing a paper form which can be sent via fax or mail to the Customer Service Center in Syracuse, NY.

You may transfer some or all of your amounts among the investment options at any time on the program web site (mrppar.equitable.com), using the automated voice response system, or by completing a paper form which can be sent via fax or mail to the Customer Service Center in Syracuse, NY.

To utilize both the website and the automated voice response system, you will need credentials which are established when you access the system for the first time. If you wish to change the Log-In ID/Password, you may do so after logging onto the website or through the automated voice response system. Transfers and contribution allocation changes confirmed on a business day before 4 p.m. Eastern Time are effective on the day a participant calls or uses the website.

Transfers and contribution allocation changes confirmed after the end of a business day will be effective the next business day. If there is a problem with a transfer request or allocation change, a Retirement Plan Account Manager will contact you at the telephone number provided, in order to clarify the request. If you cannot be contacted, the transfer will not be processed until the information is verified.

B. Administrative Expenses

The Total Annual Operating Expense Charge includes the program-related other expenses of 0.01%. These fees are to cover the cost of printing of SEC filings, prospectuses and reports, proxy mailings, other mailing costs, as well as legal and audit expenses and can vary by fund and from year to year based on actual expenses. The Total Annual Operating Expense Charge does not include the Program Expense Charge. Please see the prospectus for additional details on the Program Expense Charge (PEC). The Maximum PEC is 0.85% per year assessed as a monthly charge. We deduct the Program Expense Charge from your value in your variable investment options or funds on a pro rata basis. If those amounts are insufficient, we will deduct them from the value in the Money Market Guarantee Account. If those amounts are still insufficient, we will deduct all or a portion of the charge from your values Guaranteed Interest Option (GIO), if applicable. The Total Operating Expense Charge also does not include the $3.75 Recordkeeping Fee that is deducted from your account each quarter. See your quarterly statement for disclosure of the Program Expense Charge and Recordkeeping and Report Fee which are deducted directly from your account.

C. Closing of Investment Options to New Money

The following investment options have been closed to new money (contributions, loan repayments, transfer into). Any amounts you may have had in these investment options on the effective date of the closing remained in your account, but you were (are) no longer able to transfer or contribute any additional amounts to these investment options. You can always transfer amounts out of the closed investment option to another investment option(s), or take distributions from the closed investment option, but you can no longer transfer any amounts back into the closed investment option.

Investment Option	Effective Date of Closure
Money Market Guarantee Account	January 1, 2009
Target Date 2015 - 2055 Allocation Portfolios	July 12, 2018

Amounts remaining in the Money Market Guarantee Account continue to earn interest at the interest rate. The rate changes monthly and is expressed as an effective annual rate, reflecting daily compounding and deduction of applicable asset-based fees and charges. While the rate changes monthly, it will never be less than 1%. You may access the current monthly rate on the program website.

D. Description of voting rights related to the investment options in the program

No voting rights apply to any of the separate accounts or to the Guaranteed Options. However, as the owner of shares of the Investment Trusts, we have the right to vote on certain matters involving the Portfolios, such as:

- the election of trustees;
- the formal approval of independent public accounting firms selected for each Investment Trust; or
- any other matters described in each prospectus for the Investment Trusts or requiring a shareholders' vote under the Investment Company Act of 1940.

We will give contract owners/participants the opportunity to instruct us how to vote the number of shares attributable to their contracts if a shareholder vote is taken. If we do not receive instructions in time from all contract owners/participants, we will vote the shares of a portfolio for which no instructions have been received in the same proportion as we vote shares of that portfolio for which we have received instructions.

We will also vote any shares that we are entitled to vote directly because of amounts we have in a portfolio in the same proportions that contract owners/participants vote. One effect of proportional voting is that a small number of contract owners may determine the outcome of a vote.

The Investment Trusts sell their shares to Equitable separate accounts in connection with Equitable's annuity and/or variable life insurance products, and to separate accounts of insurance companies, both affiliated and unaffiliated with Equitable. EQ Advisors Trust also sells their shares to the trustee of a qualified plan for Equitable. We currently do not foresee any disadvantages to our policy owners arising out of these arrangements. However, the Board of Trustees or Directors of each Investment Trust intends to monitor events to identify any material irreconcilable conflicts that may arise and to determine what action, if any, should be taken in response. If we believe that a Board's response insufficiently protects our policy owners, we will see to it that appropriate action is taken to do so.

If actions relating to the Separate Account require contract owner/participant approval, contract owners/participants will be entitled to one vote for each unit they have in the variable investment options.

Each contract owner/participant who has elected a variable annuity payout option may cast the number of votes equal to the dollar amount of reserves we are holding for that annuity in a variable investment option divided by the annuity unit value for that option. We will cast votes attributable to any amounts we have in the variable investment options in the same proportion as votes cast by contract owners/participants.

The voting rights we describe in this document are created under applicable federal securities laws. To the extent that those laws or the regulations published under those laws eliminate the necessity to submit matters for approval by persons having voting rights in separate accounts of insurance companies, we reserve the right to proceed in accordance with those laws or regulations.

Part I. Performance Information

The historical returns shown below in Table 1 are based on the existing total annual operating expense reflected in Table 3 below. The fund displayed shows a rate of return from the fund's inception date as an investment option under our contract, while the fund's benchmark since inception performance shows the average rate of return for that period from the date displayed. If there is at least a 10 year performance history for the fund under the contract, no inception date performance is displayed. The start date for the benchmark utilized for the EQ/Moderate Allocation Fund is after the start date of the fund so there is no benchmark since inception performance information available. Fund performance for the period before 1-1-2009 reflects the inclusion of the Program Expense Charge in the Total Annual Operating Expenses. Additional performance information is available on the Program website at mrppar.equitable.com.

The Total Annual Operating Expenses stated below in Table 3 are before any fee waivers or expense reimbursements. Some funds are subject to these fee waivers/expense reimbursements which would result in a lower Total Annual Operating Expense for the affected funds. Please visit the program website, mrppar.equitable.com for more details and for a glossary of investment terms relevant to the investment options under this plan. This glossary is intended to assist you in better understanding your account with the Members Retirement Program.

Table 1 focuses on the performance of investment options that do not have a fixed or stated rate of return. Table 1 shows how these options have performed over time and allows you to compare them with an appropriate benchmark for the same time periods. Past performance does not guarantee how the investment option will perform in the future. Your investment in these options could lose money. Information about an option’s principal risks is available on the program web site. Information about each option’s investment manager, objective and goals, principal strategies and risks, and portfolio turnover rate is available on the investment options tab of the website at mrppar.equitable.com.

*The first inception date is the date the fund was available in the Program. If there is a second inception date it is because the fund has less than one year of performance in the product and the performance, if provided, reflects the fund's history before its availability in the Program or the benchmark since inception performance provided is from the original start date of the fund, not the start date in the product.

Morningstar US Technology	21.43%	19.33%	23.29%	N/A	12/31/2001	

*The first inception date is the date the fund was available in the Program. If there is a second inception date it is because the fund has less than one year of performance in the product and the performance, if provided, reflects the fund's history before its availability in the Program or the benchmark since inception performance provided is from the original start date of the fund, not the start date in the product.

Table 2—Fixed Return Investments			
Name	**Return**	**Term**	**Other**
Money Market Guarantee Account	See Other	N/A	The yield for the Money Market Guarantee Account will change monthly but will never be less than 1% after fees. Current rate of return information is available on the program website mrppar.equitable.com or by calling 1-800-526-2701. As noted earlier, this account is no longer accepting contributions.
Guaranteed Interest Option	See Other	N/A	The yield for the Guarantee Interest Option will change monthly but will never be less than 1% after fees. Current rate of return information is availabe on the program website mrppar.equitable.com or by calling 1-800-526-2701.

Part II. Fee and Expense Information

Table 3 shows fee and expense information for the investment options listed in Table1 and Table 2. Table 3 shows the Total Annual Operating Expenses of the options in Table 1. Total Annual Operating Expenses are expenses that reduce the rate of return of the investment option. Table 3 also shows Shareholder-type Fees. These fees are in addition to Total Annual Operating Expenses.
