

# Standard Segment

## About Structured Capital Strategies PLUS®

**Structured Capital Strategies PLUS® is a tax-deferred variable annuity that offers you a way to save for retirement through the ups and downs of the investment world. It's designed to help you protect against some loss and take advantage of market upside that tracks well-known benchmark indices, up to a performance cap.**

## How the Standard Segment works

The Standard Segment is an option for putting Structured Capital Strategies PLUS® to work for you. You can take advantage of potential growth, that tracks your chosen benchmark index, up to a cap that's set up front. At the same time, the built-in downside buffer offers protection against some loss. You choose the level of protection that gives you confidence for the 6-year period your money is invested — knowing that even when the benchmark index goes down, your initial investment is protected against that level of loss.

## Let's look at a hypothetical example

Assumptions: -20% Buffer, 60% Performance Cap Rate; \$100,000 Initial investment

Please note that individuals cannot invest directly in an index.

Variable Annuities: • Are Not a Deposit of Any Bank • Are Not FDIC Insured • Are Not Insured by Any Federal Government Agency • Are Not Guaranteed by Any Bank or Savings Association • May Go Down in Value

Equitable Financial Life Insurance Company (NY, NY)

### Level of protection

**-10% | -15% | -20%**

Select the buffer that gives you confidence

### Growth potential

**Performance Cap Rate**

Set when you invest

### Zero explicit fees\*

All the benefits of Structured Capital Strategies PLUS® are available to you with zero explicit fees. All costs related to administration, sales and contract are built into the way the performance cap and buffer work, so you'll never be charged an explicit fee and can keep more of your money working its hardest for you.

### Duration

**6 years**

#### Scenario 1:

##### Index gain above Performance Cap

- Performance Cap Rate: 60%.
- Index performance: +65%.
- Result: Your gain is +60%.

**Segment Maturity Value: \$160,000**

#### Scenario 2:

##### Index gain within Performance Cap

- Performance Cap Rate: 60%.
- Index performance: +40%.
- Result: Your gain is +40%.

**Segment Maturity Value: \$140,000**

#### Scenario 3:

##### Index loss within Segment Buffer

- Level of protection: -20%.
- Index performance: -18%.
- Result: 0% Return. Segment Buffer absorbs full loss.

**Segment Maturity Value: \$100,000**

#### Scenario 4:

##### Index loss below Segment Buffer

- Level of protection: -20%.
- Index performance: -22%.
- Result: -2% Return. Segment Buffer absorbs first 20% of loss.

**Segment Maturity Value: \$98,000**

You are protected against some downside risk but, if the negative return is in excess of the Segment Buffer, there could be substantial loss of principal because you agree to absorb all losses to the extent they exceed the protection provided. This example is a hypothetical intended for illustrative purposes only and is not indicative of actual market, index, investment or financial product performance. The example assumes the optional Return of Premium Death Benefit is not elected. Negative consequences may apply, if for any reason, amounts invested in a Segment are removed before the Segment Maturity Date.

Let's check out how the S&P 500 Price Return Index has performed historically. Here, we see returns of 6-year periods on a rolling monthly basis (e.g., Jan–Jan, Feb–Feb) and how frequently losses have occurred. The protective buffer for Standard Segments is available at -10%, -15% or -20%, and stays at a constant level for the 6-year duration.

## Historical 6-year index returns January 1980–December 2021

### S&P 500

Average return <sup>1</sup>	74.5%
Total returns	432
Number of positive returns	389
Number of negative returns	43
<b>% of times return was greater than Segment Buffer</b>	
-10% Segment Buffer	97.5%
-15% Segment Buffer	99.8%
-20% Segment Buffer	100%

**The largest 6-year loss in the S&P 500 Index dating back to 1980 was -15.04%**

(month ending December 2005).

\*Expenses related to administration, sales and certain risks in the contract are factored into the Performance Cap Rate. As long as your money is invested in the Structured Investment Option to take advantage of the buffer against some loss and potential for growth up to the cap, you will not be charged additional fees. If you choose the optional Return of Premium Death Benefit, fees and charges will apply.

1 Average return — A simple average of a series of returns generated over a given period of time. Returns are price return only and exclude dividends.

**Performance Cap Rate** — For Standard Segments, the Performance Cap Rate is the highest Segment Rate of Return that can be credited on a Segment Maturity Date.

**Segment Buffer** — The portion of any negative index performance rate that the Segment Buffer absorbs on a Segment Maturity Date. Any percentage decline in a Segment's index performance rate in excess of the Segment Buffer reduces your Segment Maturity Value.

**Standard Segment** — For Standard Segments, the Segment Rate of Return is equal to the index performance rate subject to the Performance Cap Rate and Segment Buffer.

**S&P 500 Price Return Index** — Includes 500 leading companies in leading industries of the U.S. economy, capturing approximately 80% coverage of U.S. equities. The S&P 500 Price Return Index does not include dividends declared by any of the companies included in this index. Larger, more established companies may not be able to attain potentially higher growth rates of smaller companies, especially during extended periods of economic expansion. **Variable annuities are sold by prospectus only, which contains more complete information about the policy, including risks, charges, expenses and investment objectives. You should review the prospectus carefully before purchasing a policy. Contact your financial professional for a copy of the current prospectus.**

Please note that an annuity contract that is purchased to fund an Individual Retirement Account (IRA) should be considered for the annuity's features and benefits other than tax deferral. For such cases, tax deferral is not an additional benefit for the annuity. You may also want to consider the relative features, benefits and costs of this annuity with any other investment that you may have in connection with your retirement plan or arrangement. Certain types of contracts and features may not be available in all jurisdictions. In addition, some distributors may eliminate and/or limit the availability of certain features or options, based on annuitant issue age or other criteria. This flyer is not a complete description of the Structured Capital Strategies PLUS® variable annuity.

An annuity, such as Structured Capital Strategies PLUS®, should be considered a long-term investment product designed to help you save for retirement, providing the opportunity for growth potential through the accumulation of assets on a tax-deferred basis by investing in selected investment options. There are fees and charges associated with annuities. In essence, annuities are contractual agreements in which payment(s) are made to an insurance company, which agrees to pay out an income or a lump-sum amount at a later date. In addition, annuities are subject to market risk, including loss of principal in the Structured Investment Options. Withdrawals are subject to

ordinary income and, if taken prior to age 59½, a 10% federal income tax penalty may apply.

**Transfers or withdrawals during a Segment:** The Segment Interim Value is the value of your investment prior to the Segment Maturity Date, and it may be lower than your original investment in the Segment even where the index is higher at the time of the transfer or withdrawal prior to maturity. A transfer or withdrawal from the Segment Interim Value may be lower than your Segment Investment and may be less than the amount you would have received had you held the investment until the Segment Maturity Date.

The indexes tracked by the SIO are price return indexes, which does not reflect any growth associated from dividend payments. Therefore, the performance of the index selected will be less than owning the actual securities tracked by the index. This difference in performance will compound and increase over time.

The Return of Premium Death Benefit (ROP DB) is an optional rider that returns the sum of premiums adjusted pro rata for withdrawals. You cannot terminate the ROP DB once you elect it. The death of the reference life on a contract determines when the ROP DB is payable. The reference life for the ROP DB is the original owner(s) (or annuitant, if applicable). The reference life will be set for the life of the contract at issue. For joint owner contracts, both spouses are reference lives, and the ROP DB is payable upon the death of the second spouse. After the death of the first spouse, the remaining reference life is the surviving spouse. The ROP DB fee is equal to an annual rate of 0.20% for all Segments within Structured Capital Strategies PLUS®.

Please note that there are Variable Investment Options, as well as additional types of Segments called Step Up Segments and Enhanced Upside Segments. These options are not currently available through this broker/dealer, or may not be initially available when the contract is issued. Please see your product prospectus for more information.

All contract and rider guarantees, including optional benefits and any fixed subaccount crediting rates or annuity payout rates, are backed by the claims-paying ability of Equitable Financial Life Insurance Company. They are not backed by the broker/dealer from which this annuity is purchased, by the insurance agency from which this annuity is purchased or any affiliates of those entities, and none makes any representations or guarantees regarding the claims-paying ability of Equitable Financial Life Insurance Company. Annuities contain certain restrictions and limitations. For costs and complete details, contact a financial professional.

Structured Capital Strategies PLUS® 21 (June 2021 version) is a registered service mark of Equitable Financial Life Insurance Company, 1290 Avenue of the Americas, NY, NY 10104.
