Managed Portfolio Strategies

Strategic Mutual Fund Only Series

Fact sheet | April 2026

Seasoned portfolio management

Equitable Investment Management is a registered investment adviser that has managed asset allocation strategies for mutual funds since 2003. As of December 31, 2025, we had $128.7 billion in assets under management.[1] Our Managed Portfolio Strategies build upon our experience managing asset allocation strategies across the risk spectrum, from conservative to aggressive growth.

Thoughtful portfolio construction

The combination of active and passive investments has been an approach long utilized successfully by institutional investors. Equitable Investment Management uses both types of strategies in each Managed Portfolio Strategy. Actively managed mutual funds are used when appropriate to provide potential performance opportunities and analysis using the underlying fund manager's market experience. Passively managed investments include ETFs and index funds, which seek to either track the investment results or match the performance of a major market index and are used to provide market exposure.
