

Series B

Fact card

This fact card is one part of the Structured Capital Strategies PLUS® variable annuity investor kit, which we're required to provide to you in full. Please read all documents in the kit carefully, including the product prospectus, to make sure you have a full understanding of Structured Capital Strategies PLUS® and its benefits.

Issue ages **0–85** for Nonqualified, Roth IRA, Traditional IRA, Inherited IRA, NQ and SEP IRA Funds. Ages 20–75 for Qualified Plans. Ages 0–18 are available under a custodial agreement under the Uniform Gifts to Minors Act (UGMA) or Uniform Transfers to Minors Act (UTMA).
May vary in some states.

Initial minimum contribution \$25,000

Subsequent minimum contribution Nonqualified Funds & Qualified Plans: \$500
Roth IRA & Traditional IRA: \$50
There is no minimum requirement for transfers into a Segment or for contributions/transfers to a Segment Type Holding Account.

Maximum contribution \$1.5 million
Higher contributions require prior approval. Maximum contribution through age 85 (or if later, the first contract date anniversary).

Fees **SIO: No explicit fees apply** — they are accounted for when determining the Performance Cap Rate.¹
VIO: Explicit fees apply to funds in the VIO and Segment Type Holding Account.

Segment Start Date There is generally a Segment Start Date every Thursday. If a particular Thursday is not a business day, then the Segment Start Date for that week will be the previous business day.*

Performance Cap Rate Rates are set in advance, at least 1 week prior to the Segment Start Date.

* Refer to the prospectus for treatment of holidays.

Variable Annuities: • Are Not a Deposit of Any Bank • Are Not FDIC Insured • Are Not Insured by Any Federal Government Agency • Are Not Guaranteed by Any Bank or Savings Association • May Go Down in Value

Equitable Financial Life Insurance Company (NY, NY)

Segment Maturity Date The Segment transaction date on which a Segment ends.*

Segment Type Holding Account EQ/Money Market

Withdrawal Charge Schedule 6 Years [7, 7, 6, 5, 4, 3] The charge on each contribution is 7% for the first 2 years, 6% for the third year, 5% for the fourth year, 4% for the fifth year and 3% for the sixth year.

Structured Investment Option

Segment Option	Index	Duration	Downside Segment Buffer	
Standard	S&P 500 Russell 2000® MSCI EAFE NASDAQ 100 ² MSCI Emerging Markets ² EURO STOXX 50 ²	1-Year	-10%	
	S&P 500	1-Year	-15%	
	S&P 500 Russell 2000® MSCI EAFE NASDAQ 100 ²	6-Year	-10% -15% -20%	
	Annual Lock	S&P 500 Russell 2000® MSCI EAFE	6-Year	-10%
	Dual Direction²	S&P 500	6-Year	-10% -15% -20%
Enhanced Upside²	S&P 500	6-Year	-10% -15%	
Step Up²	S&P 500 Russell 2000® MSCI EAFE	1-Year	-10%	

1 Expenses related to administration, sales and certain risks in the contract are factored into the Performance Cap Rate. As long as your money is invested in the Structured Investment Option to take advantage of the buffer against some loss and potential for growth up to the cap, you will not be charged additional fees. If you choose the optional Return of Premium Death Benefit, or invest your money in a Variable Investment Option, fees and charges will apply.

2 May not be available in all firms and jurisdictions. Individuals cannot invest directly in an index. Please note that due to spacing constraints, the index names in the chart above may have been abbreviated. For full index names, please refer to the important terms section. Please see the back page for additional important information.

Investment options

Structured Investment Option (SIO)

The Structured Investment Option gives you a simplified way to take advantage of possible gains knowing you're protected from a portion of loss. We call each investment within the SIO a Segment, and you can invest in one or more Segments for set time periods.

There are five types of Segment Options, each of which provides performance tied to the performance of a well-known benchmark index for a set period, up to a Performance Cap Rate. If the market goes down, your investment is protected against a portion of loss through a Segment Buffer.

The five types of Segments currently available are:

Standard Segment	Tracks the performance of your chosen index from the start of the Segment Duration to the end, measuring it from point to point. If the index performance is up, you can capture growth up to the Performance Cap Rate. If the chosen benchmark index performance is negative, the chosen Segment Buffer will absorb up to 20% of loss.
Annual Lock Segment	Provides a return that is cumulatively calculated based on index performance each Annual Lock Period, subject to the Performance Cap Rate and Segment Buffer. The Performance Cap Rate is determined at the inception of the 6-year Segment Duration. The -10% Segment Buffer protects against the first 10% of loss each Annual Lock Period.
Dual Direction Segment	Offers the potential for returns in two ways: growth up to a cap when index performance is up, and growth within the Segment Buffer. Your investment will receive a positive return of the same percentage if the benchmark index shows a loss that is up to and inclusive of up to -20% at maturity. When the market goes down more than -20%, a buffer protects against up to 20% of loss depending on the Segment Buffer you elect.
Enhanced Upside Segment	Offers the potential for Enhanced Upside return up to the Performance Cap Rate if the index performance is positive. The Segment Rate of Return is equal to the lesser of the Performance Cap Rate or the index performance rate multiplied by the Enhanced Upside Rate if the index performance rate is positive, up to the performance cap rate. When the market goes down more than -15%, a buffer protects against up to 15% of loss.
Step Up Segment	Offers an upside guaranteed return that is equal to the Performance Cap Rate if the index performance is equal to or greater than zero when the Segment matures. If the chosen benchmark index performance is negative, the Segment Buffer will absorb up to 10% of loss.

The amount you would receive would be calculated using the formula for the Segment Interim Value.

The SIO does not involve an investment in any underlying portfolio. Instead, it is an obligation of Equitable Financial.

Variable Investment Option (VIO)

The VIO is also available, without Segment Buffers or Performance Cap Rates.

Underlying investment portfolio expense

(expressed as an annual percentage of daily net assets)

EQ/Money Market	0.71%
------------------------	-------

Please read the prospectus for detailed fee information.

EQ/Money Market

Your investment return is dependent on the performance of the underlying portfolio, subject to market fluctuations and could include the loss of principal.

(See important terms section.)

Dollar Cap Averaging (DCA)

The Dollar Cap Averaging Program (DCA) is an optional service designed to reduce investment timing decisions by systematically investing in any of the available Segments over a period of either 3 or 6 months. The program invests in the Dollar Cap Averaging Account, which is part of the EQ/Money Market Variable Investment Option. The Dollar Cap Averaging Account has the same rate of return as the EQ/Money Market Variable Investment Option. The program allows you to gradually allocate amounts to available Segments by periodically transferring approximately the same dollar amount to your selected Segments. Regular allocations to the Segments will allow you to invest in the Segments at different Performance Cap Rates. This plan of investing, however, does not guarantee that you will earn a profit or be protected against losses. We may, at any time, exercise our right to terminate transfers to any of the Segments, limit the number of Segments that you may elect, or discontinue offering the program. The DCA can be funded from both new contributions to your contract and transfers from the investment options, including the EQ/Money Market Variable Investment Option. If you elect to invest in the DCA at contract issue, 100% of your initial contribution must be allocated to the DCA. In other words, your initial contribution cannot be split between your DCA and any other investment option available under the contract. Dollar Cap Averaging is not available if the Performance Cap Rate Hold is elected.

You are protected against some downside risk, but if the negative return is in excess of the Segment Buffer, there could be substantial loss of principal because you agree to absorb all losses to the extent they exceed the protection provided.

Performance Cap Rate Hold

- Clients can invest in Segments based on current rates or elect the new Performance Cap Rate Hold Option on the application.
- If a client elects a Cap Rate Hold, the caps are effective on the application received date and the cap rates are held for all Segment investments through the Rate Hold Expiration Date which is the Segment Start Date on or immediately following 30 days after the Application Received Date.
- Once elected the rate hold cannot be cancelled.

Withdrawing money

Withdrawals from a Segment:

Withdrawals prior to the Segment Maturity Date reduce the Segment Investment on a pro rata basis by the same proportion that the Segment Interim Value is reduced on the date of the withdrawal.

Systematic Withdrawal Program:

- Standard systematic withdrawal service program to allow specified percentage or dollar amount withdrawals.
- Frequency: withdrawals may be taken monthly, quarterly or annually.

Free Withdrawal Amount:

- Access up to 10% of the beginning-of-contract-year account value free of withdrawal charges.
- Prior to the sixth Contract Date Anniversary, any amount withdrawn above the Free Withdrawal Amount during a Contract Year will be withdrawn in the following order: from Contributions (on a first-in, first-out (FIFO) basis) until exhausted; then, from earnings.
- On or after the sixth Contract Date Anniversary, any amount withdrawn above the Free Withdrawal Amount during a Contract Year will be withdrawn in the following order: 1) from Contributions to which a withdrawal charge no longer applies (on a FIFO basis) until exhausted, 2) from earnings (which are determined at the time they are deemed withdrawn) until exhausted, 3) from Contributions to which a withdrawal charge still applies (on a FIFO basis).

Withdrawals in Excess of Free Withdrawal Amount:

If withdrawals are made prior to 6 years after making a contribution, the investor will incur a declining withdrawal charge, a percentage dependent on the year they withdraw. Withdrawal charges may be waived under certain circumstances. Note: A new withdrawal charge schedule will apply to each contribution as of the date received by Equitable Financial.

Withdrawal Charges

Contract Year	1	2	3	4	5	6	7+
Declining Withdrawal Charge	7%	7%	6%	5%	4%	3%	None

Partial withdrawals are permitted.

Unless otherwise requested, withdrawals are taken in the following order on a pro rata basis:

- 1 Variable Investment Option (VIO)
- 2 Segment Type Holding Account(s)
- 3 Dollar Cap Averaging Account (DCA)
- 4 Segment(s)

Alternatively, you can elect to take your withdrawals from specific investment options. Amounts withdrawn from active Segments will be valued using the formula for calculating the Segment Interim Value.

(See important terms section.)

Segment transfers

- Segment transfers are allowed prior to maturity date based on the Segment Interim Value.
- Transfers prior to the Segment Maturity Date will reduce the Segment Investment on a pro rata basis by the same proportion that the Segment Interim Value is reduced on the date of the transfer

Automatic Required Minimum Distribution (RMD) withdrawal service is available. Beginning in the calendar year in which you reach age 72 (or age 70½ if applicable), you will receive an annual RMD payment in December when you enroll in the RMD program.³ RMD withdrawals that are distributed through the program that are in excess of the 10% free withdrawal amount are not subject to withdrawal charges. Withdrawn money is taken in the same order as partial withdrawals (see above).

³ For traditional IRAs, due to a federal law change effective January 1, 2020, the date you must begin your Lifetime Required Minimum Distributions (RMDs) has changed from April 1 of the calendar year after the year you turn age 70½ to April 1 of the calendar year after you turn age 72 if you attain age 70½ on or after January 1, 2020. This means that if you were born June 30, 1949 or earlier, you must begin taking your RMDs by April 1 of the calendar year after the year in which you turn age 70½. If you were born July 1, 1949 or later, you must begin taking your RMDs by April 1 of the calendar year after the year in which you turn age 72.

Death Benefit

Return of Account Value as of the date all paperwork is received in good order, without any missing or unclear information.

The Segment Interim Value is used in the calculation of the death benefit, and may be lower than the original investment in the Segment, even when the index is higher at the time of the death benefit payment than at the time of the original investment. If an investor dies before the Segment Maturity Date, the Segment Buffer will not necessarily apply to the extent it would on the Segment Maturity Date, and any upside performance will be limited to a percentage lower than the Performance Cap Rate.

(See Segment Interim Value in the important terms section.)

Structured Capital Strategies PLUS[®] Return of Premium Death Benefit⁴ is an optional rider that returns the sum of premiums adjusted pro rata for withdrawals and is offered to ages between 0 and 75. The maximum contribution age for contracts

with Return of Premium Death Benefit will be through age 75 or, if later, the first contract date anniversary. You cannot terminate the Return of Premium Death Benefit once you elect it. The Return of Premium Death Benefit fee is equal to an annual rate of 0.20% for all Segments within Structured Capital Strategies PLUS[®] and the Variable Investment Options. The death of the reference life on a contract determines when the Return of Premium Death Benefit is payable. The reference life for the Return of Premium Death Benefit is the original owner(s) (or annuitant, if applicable). The reference life will be set for the life of the contract at issue. For joint owner contracts, both spouses are reference lives, and the Return of Premium Death Benefit is payable upon the death of the second spouse. The Return of Premium Death Benefit will not be available for contracts with: 1. Non-spousal joint owners, 2. Joint annuitants if there is a non-natural owner.

Tax consequences

Distributions taken prior to annuitization are generally considered to come from the gain in the contract first. If the contract is tax-qualified, generally all withdrawals are

treated as distributions of gain. Withdrawals of gain are taxed as ordinary income and, if taken prior to age 59½, may be subject to an additional 10% federal tax.

Important terms

Account Value

The total of: (i) the values you have in the Variable Investment Options; (ii) the values you have in the Segment Type Holding Accounts; and (iii) your Segment Interim Values.

Annual Lock Anniversary

The end of each Annual Lock Period.

Annual Lock Anniversary Ending Amount

The amount on an Annual Lock Anniversary calculated for the first Annual Lock Period by adding the Annual Lock Return Amount to the Segment Investment, as adjusted for any withdrawals from that Segment. For subsequent Annual Lock Periods, the amount is calculated by adding the Annual Lock Return Amount to the previous Annual Lock Anniversary Amount, as adjusted for any withdrawals from that Segment. The Annual Lock Anniversary Amount is used solely to calculate the Segment Maturity Value for Annual Lock Segments. The Annual Lock Anniversary Amount is not credited to the contract, is not the Segment Interim Value and cannot be received upon surrender or withdrawal.

Annual Lock Anniversary Starting Amount

The Annual Lock Anniversary Starting Amount for the first Annual Lock Period is equal to the Segment Investment, as adjusted for any withdrawals from that Segment. For subsequent Annual Lock Periods, it is equal to the Annual Lock Anniversary Ending Amount for the prior Annual Lock Period, as adjusted for any withdrawals from that Segment. The Annual Lock Anniversary Starting Amount is not credited to the contract, is not the Segment Interim Value and cannot be received upon surrender or withdrawal.

Annual Lock Period

Each of the 1-year periods during an Annual Lock Segment.

Annual Lock Segment

Any multiyear duration Segment belonging to a Segment Type whose name includes "Annual Lock." Unlike other Segments, your return is cumulatively calculated based on index performance each Annual Lock Period, subject to the Performance Cap Rate and Segment Buffer.

Annual Lock Yearly Rate of Return

The rate of return for an Annual Lock Segment during an Annual Lock Period as calculated on the Annual Lock Anniversary. If the index performance rate is positive, then the Annual Lock Yearly Rate of Return is a rate equal to the index performance rate, but not more than the Performance Cap Rate. If the index performance rate is negative, but declines by a percentage less than or equal to the Segment Buffer, then the Annual Lock Yearly Rate of Return is 0%. If the index performance rate is negative, and declines by more than the Segment Buffer, then the Annual Lock Yearly Rate of Return is negative, but will not reflect the amount of the Segment Buffer (i.e., the first 10% of downside performance).

Annual Lock Yearly Return Amount

Equals the Segment Investment multiplied by the Annual Lock Yearly Rate of Return for the first Annual Lock Period. For subsequent Annual Lock Periods, it is equal to the Annual Lock Anniversary Starting Amount multiplied by the corresponding Annual Lock Yearly Rate of Return.

⁴ May not be available in all firms and jurisdictions.

Dollar Cap Averaging (DCA) Program	Our Dollar Cap Averaging Program allows for the systematic transfer of amounts in the Dollar Cap Averaging Account into the Segment Type Holding Accounts.
Dual Direction Segment (May not be available in all firms and jurisdictions)	Any Segment belonging to a Segment Type whose name includes “Dual Direction.” Dual Direction Segments measure the performance of the index from Segment Start Date to Segment Maturity Date. If the corresponding index performance rate exceeds the Performance Cap Rate during this time period, you receive the Performance Cap Rate. If the index performance rate is between the Performance Cap Rate and Segment Buffer (inclusive of both), you receive the absolute value of the index performance. If the index performance rate is less than the Segment Buffer, the Segment Buffer will absorb up to the first 20% of the loss depending on the Segment Buffer you elect.
Enhanced Upside Segment (May not be available in all firms and jurisdictions)	An Enhanced Upside Segment is any Segment belonging to a Segment Type whose name includes “Enhanced Upside.” For the Enhanced Upside Segment, the Segment Rate of Return is equal to the lesser of the Performance Cap Rate or the index performance rate multiplied by the Enhanced Upside Rate if the index performance rate is positive. The Enhanced Upside Rate is a percentage that is used to multiply a positive index performance rate.
Performance Cap Rate	For Standard, Dual Direction and Enhanced Upside Segments, the Performance Cap Rate is the highest Segment Rate of Return that can be credited on a Segment Maturity Date. For Annual Lock Segments, the Performance Cap Rate is the highest Annual Lock Yearly Rate of Return that can be applied on an Annual Lock Anniversary. For Step Up Segments, the Performance Cap Rate is the Segment Rate of Return if the index performance rate for that Segment is greater than or equal to zero. The Performance Cap Rate is not an Annual Rate of Return.
Segment Buffer	The portion of any negative index performance rate that the Segment Buffer absorbs on a Segment Maturity Date or each Annual Lock Anniversary for a particular Segment. Any percentage decline in a Segment’s index performance rate in excess of the Segment Buffer reduces your Segment Maturity Value and any Annual Lock Anniversary Ending Amount.
Segment Duration	Period from Segment Start Date to Segment Maturity Date.
Segment Interim Value (SIV)	The value of your investment in a Segment prior to the Segment Maturity Date, and it may be lower than your original investment in the Segment even where the index is higher at the time of the withdrawal prior to maturity. A withdrawal from the Segment Interim Value may be lower than your Segment Investment and may be less than the amount you would have received had you held the investment until the Segment Maturity Date.
Segment Investment	The amount transferred to a Segment on its Segment Start Date, as adjusted for any withdrawals from that Segment.
Segment Maturity Date	The Segment business day on which a Segment ends.
Segment Option	Comprises all Standard Segments, Annual Lock Segments, Dual Direction Segments, Enhanced Upside Segments or Step Up Segments.
Segment Rate of Return	The rate of return earned by a Segment as calculated on the Segment Maturity Date. The Segment Rate of Return is calculated differently for different Segment Options.
Segment Start Date	The Segment business day on which a new Segment is established.
Segment Type	An investment option we establish with the index, Segment Duration and Segment Buffer of a specific Segment Type, and for which we also specify a Segment Maturity Date and Performance Cap Rate.
Segment Type Holding Account	An account that holds all contributions and transfers allocated to a Segment Type pending investment in a Segment. There is a Segment Type Holding Account for each Segment Type. The Segment Type Holding Accounts are part of the EQ/Money Market Variable Investment Option.
Standard Segment	For Standard Segments, the Segment Rate of Return is equal to the index performance rate, subject to the Performance Cap Rate and Segment Buffer.
Step Up Segment (May not be available in all firms and jurisdictions)	Any Segment belonging to a Segment Type whose name includes “Step Up.” For Step Up Segments, the Segment Rate of Return is equal to the Performance Cap Rate if the index performance rate for that Segment is greater than or equal to zero on the Segment Maturity Date.
Structured Investment Option (SIO)	An investment option that permits you to invest in various Segments, each tied to the performance of an index, and participate in the performance of that index.

Index descriptions

S&P 500 Price Return Index

The S&P 500 Price Return Index includes 500 leading companies in leading industries of the U.S. economy, capturing approximately 80% coverage of U.S. equities. The S&P 500 Price Return Index does not include dividends declared by any of the companies included in this index. Larger, more established companies may not be able to attain potentially higher growth rates of smaller companies, especially during extended periods of economic expansion. S&P®, Standard & Poor's®, S&P 500® and Standard & Poor's 500® are trademarks of Standard & Poor's Financial Services LLC ("Standard & Poor's") and have been licensed for use by Equitable Financial. Structured Capital Strategies PLUS® is not sponsored, endorsed, sold or promoted by Standard & Poor's, and Standard & Poor's does not make any representation regarding the advisability of investing in Structured Capital Strategies PLUS®.

Russell 2000® Price Return Index

The Russell 2000® Price Return Index measures the performance of the small-cap segment of the U.S. equity universe. It includes approximately 2,000 of the smallest securities based on a combination of their market cap and current index membership. The Russell 2000® Price Return Index does not include dividends declared by any of the companies included in this index. Stocks of small- and mid-size companies have less liquidity than those of larger companies and are subject to greater price volatility than the overall stock market. Smaller company stocks involve a greater risk than is customarily associated with more established companies. The Russell 2000® Index is a trademark of Russell Investments and has been licensed for use by Equitable Financial. The product is not sponsored, endorsed, sold or promoted by Russell Investments, and Russell Investments makes no representation regarding the advisability of investing in the product.

MSCI EAFE Price Return Index

The MSCI EAFE Price Return Index is a free float-adjusted market capitalization index that is designed to measure the equity market performance of developed markets, excluding the United States and Canada. The MSCI EAFE Price Return Index does not include dividends declared by any of the companies included in this index. International securities carry additional risks, including currency exchange fluctuation and different government regulations, economic conditions and accounting standards. The product referred to herein is not sponsored, endorsed, or promoted by MSCI, and MSCI bears no liability with respect to any such product or any index on which such product is based. The prospectus contains a more detailed description of the limited relationship MSCI has with Equitable Financial and any related products.

NASDAQ 100 Price Return Index (Not available in all jurisdictions)

The NASDAQ 100 Price Return Index includes 100 of the largest domestic and international non-financial securities listed on The NASDAQ Stock Market based on market capitalization. The index reflects companies across major industry groups, including computer hardware and software, telecommunications and biotechnology. Non-diversified investing may be focused in a smaller number of issues or one sector of the market that may make the value of the investment more susceptible to certain risks than diversified investing. The NASDAQ 100 Price Return Index does not include dividends declared by any of the companies included in this index.

MSCI Emerging Markets Price Return Index (Not available in all jurisdictions)

The MSCI Emerging Markets Price Return Index is a free float-adjusted market capitalization index that is designed to measure equity market performance of emerging markets. International securities carry additional risks, including currency exchange fluctuation and different government regulations, economic conditions and accounting standards.

EURO STOXX 50® Price Return Index (Not available in all jurisdictions)

The EURO STOXX 50® Index provides a blue-chip representation of super sector leaders in the Eurozone. The index covers 50 stocks from Eurozone countries. The EURO STOXX 50® Price Return Index does not include dividends declared by any of the companies included in this index. The EURO STOXX 50 is the intellectual property (including registered trademarks) of STOXX Ltd., Zug, Switzerland ("STOXX"), Deutsche Börse Group or their licensors, which is used under license. The product is neither sponsored, promoted, distributed nor in any other manner supported by STOXX, Deutsche Börse Group, their licensors, research partners or data providers and STOXX, Deutsche Börse Group and their licensors, research partners or data providers do not give any warranty, and exclude any liability (whether in negligence or otherwise) with respect thereto generally or specifically in relation to any errors, omissions or interruptions in the EURO STOXX 50® index or its data.
